NEUTRAL STRETCH **FILM**

EN

The **stretch film** manufactured by Gruppo Fabbri can be found in a variety of formulations and formats, allowing food companies, supermarkets, hypermarkets and specific production centres to package in full safety and with the maximum quality guarantee, fresh food products such as fruit and vegetables, red and white meat, fish, cheese, fresh pasta, gastronomy. The characteristic “skin effect” and the special anti-condensation properties protect food effectively and naturally, keeping all its organoleptic and nutritional properties intact, while the particular “memory effect” of the **film** keeps the package in its original appearance even after it has been handled several times. The innovative formulation of the material, the extreme ease of use and an excellent quality-price ratio make Gruppo Fabbri the **top stretch** film manufacturer in the world, which still today is the material most often used in food packaging.

Main characteristics	Superior elasticity	By way of the extreme elasticity of the material, Gruppo Fabbri stretch film can be used in smaller quantities with respect to standard film, considerably saving time and money. The special “memory effect” and the high resistance to tearing provide the packaged food with the best protection possible and keep its original appearance during the entire product shelf-life, even with irregular or sharp surfaces.
	Anti-fog breathability	The particular formulation of Gruppo Fabbri’s film, constantly being improved thanks to huge investments in research and development, generates a very thin, highly transparent material, with an ideal anti-condensation effect; features which are essential to guarantee excellent and prolonged preservation of the packaged product.
	Transparency and shine	The features of brightness and shine, together with the typical “skin effect” and the excellent anti-condensation properties give the packaged product immediate and clear visibility on the shelf, enhancing its freshness and quality.
	Consistent thickness and qualitative characteristics	Gruppo Fabbri manufactures the film in a completely automated way and with an extrusion method which is at the forefront of the industry. This makes it possible to obtain a double-layer stretch film, characterised by even thickness and constant quality, essential to provide high performance with all types of packaging machines, from retail to high-speed industrial machines.
	The ideal combination is with automatic stretch machines manufactured by Gruppo Fabbri	Gruppo Fabbri is the only company on the market which manufactures foodstuff film and automatic packaging machines: the synergy between these two types of product guarantees those working in the food packaging industry to attain the maximum result with the minimum investment. Gruppo Fabbri film achieves excellent performance even on many other packaging machines present on the market.
	Wide range of solutions	The food film manufactured by Gruppo Fabbri has a variety of formulations and thicknesses and can be chosen according to the machinery and products it is intended for.

2 2 different formulations: 1 and 8.

8 Min thickness: 8 µm.

30 Max thickness: 30 µm.

111 Inner reel core: 111 mm (optional: 76 mm).

210 Min width: 210 mm.

650 Max width: 650 mm.

800 Min film length: 800 m.

2400 Max film length: 2400 m.
