

- Safety first: functionality and design excellence to operate safely
- Next generation electronics: advanced technology for maximum durability and reliability
- Reduced power consumption: more efficiency, less costs, more green!

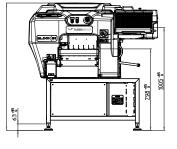

*Elixa 21*, automatic stretch packager with Elixa® technology of the last generation, particularly suitable for **in-store applications**, differs from previous series by achieving higher targets in terms of **safety**, **technology** and **economy**.

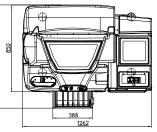

The additional photocells added at the feed entrance, the next-generation microswitches designed to prevent tampering, the innovative design of the discharge which prevents any access to the moving parts, the gas springs for the opening of the exit device ensures users to operate in **complete safety**.

The **next generation electronics** featured in *Elixa 21* ensures maximum durability and reliability of the machine even in problematic environments.

Thanks to the sealing belt on the outlet tray equipped with smart stand-by mode and to the new outfeed, *Elixa 21* can reduce energy consumption and heat dissipation **saving up to 50%** compared to previous series (*Elixa XP*).

## Main characteristics

Safety first	Every part of <i>Elixa 21</i> has been designed in compliance with the strictest <b>safety regulations</b> . The elegant <b>rounded lines</b> also reduce the consequences of accidental impact.
Speed	Elixa 21 reaches a speed of 21 ppm: 5% more than the previous model (Elixa XP).
Automatic reading	Elixa 21 requires no operator intervention in the event of a <b>format change</b> : this makes it particularly suitable for <b>in-store applications</b> .
Super-stretch technology	Thanks to the Elixa® technology, <i>Elixa 21</i> uses <b>one width films (280 mm)</b> regardless of the size of the product, allowing a <b>saving of film up to 20%</b> compared to traditional packaging machines.
Compactness	With a <b>frontal</b> configuration, and a footprint of about <b>1 m2</b> , <i>Elixa 21</i> manages to fit into any work environment, optimizing the available space.
Maximum integration	Elixa 21 can be integrated optimally with the major manual weigh-price labelling systems available on the market, keeping volume and footprint virtually unchanged.
Versatility	With a wide choice of <b>options</b> , <i>Elixa 21</i> can be easily customized according to customer <b>requirements</b> .
Simplicity	Characterized by an extremely intuitive and easy to remember operation, <i>Elixa</i> 21 simplifies the turnover of employees. It only takes <b>30"</b> to change the reel: an error-proof, simple operation!
Proper professional packaging	The synergy between the new Elixa® series machines and food-grade films produced by <i>Gruppo Fabbri</i> allows the realities operating in food packaging achieving maximum results with minimum investment. <i>Elixa 21</i> can use <b>neutral super-stretch film</b> or <b>continuously printed film</b> which seals on the lower part of the tray thanks to the efficiency of the sealing belt.
Plug 'n' Pack mode	Elixa 21 is powered by 230 V without any need for compressed air.
Energy saving	With a new advanced software, <i>Elixa 21</i> is able to manage its own ignition timing in on/off mode, thus optimising consumption and offering energy savings of up to <b>50%</b> compared to the previous model ( <i>Elixa XP14</i> ).

Maximum speed: up to 21 packages a minute.

the list.

Optional features from

**120** 

Minimum tray format: 120 x 100 x 10\* (L x W x H).

Reel change time 30".

**17**0

Maximum tray format: 350 x 230 x 130\* (L x W x H).

Machine weight:

Reel width: 280 mm (one width).

23(

Supply voltage: 230 V mono-phase

\*it is not possible to achieve the three maximum dimensions of the tray at the same time

170 kg.
